HUNTING MOUFLON-RAM IN AUSTRIA

A very interesting hunting adventure

The Mouflone is domestic in Austria for several centuries and developed very well since. Actually it is a highly demanded game and we are lucky being able to offer a very good population in Austria with high quality trophies.

This fascinating game is very shy and unsettled. Therefore we hunt the difficult Mouflon-Ram during daylight by stalking it or wait for them in binds.

Chances to harvest a very special trophy with a curl length of up to 95 centimeters are good. But be early with your booking for the hunt during the rut (October) or in winter time (November to January).
