HUNTING IN FANTASTIC AFRICA

Incredible & exciting hunting in Tanzania 2009

population of the entire continent. In addition, Tanzania is also the country with the highest population of elephants. Over the years, Tanzania has acquired legendary fame, now being in the first position in almost any Record book.

The country

With a surface of 984,000 square kilometers, 38 percent of which is dedicated to protected lands, Tanzania represents the African country with the most reserved land and is the host of some of the most famous destinations such as the Serengeti, Ngorongoro and the Famous Selous Game Reserve. Because of these reserves, the flora and fauna of the country are rich and plentiful. The national languages of the country are Kiswahili and English, both of which are widely spoken even in the remote areas of the country. Tanzania is hunter friendly and very well developed in tourism which represents a huge part of the economy, due, in part, to the stability of the national government and the local authorities. The hospitality and warmth of the Tanzanian people is sure to be a pleasant surprise to all visitors.

Hunting

Tanzania has a high density of animals, including a large concentration of native trophy. All of the hunting in the country is well regulated and managed by strict law that was established by the wildlife department, which helps to establish Tanzania as the African Nation with the highest population of lions, hosting at least half of the

Hunting Areas

We hunt in three different districts, the south, the north and the west and are responsible for controlling the hunting ground either directly or through partnerships. Below you will find the map with the different locations.

Our Partner & Politic Situation

Our Partner is a family driven business that was started in 1967 in Angola. Then, after going to several other countries, they established themselves in Tanzania in the 1990s, where they operate until today. Tanzania is now considered to be one of the three most stable political nations in Africa.

Hunting Areas in detail

Selous Game Reserve

With 54.000km the Selous Game Reserve is the largest in the World, completely uninhabited with (according to the last estimates) 170 thousand buffalos, 68 thousand elephants, 24 thousand lions and an abundant population of their species (330 different animal species and 2000 plant species).

This reserve always gives excellent results and great hunts. The terrain varies widely, from planes in the North to high mountains, some of which completely unexplored.

The best period for hunting buffalo and elephant in this area is from September onwards, with incredible animal density. We operate in three different hunting areas in the Selous.

Extreme South

This area is one of the wildest on Earth and it is famous for its large elephants. Every year many operators get great results here, with

growing average. We operate in two different areas in the extreme South.

West :

This area is famous for cats. We operate in three different areas in the West: Katavi, Ngombe and one top area Rungwa. The terrain is mild, with small mountains.

Katavi: borders for over 60km with the Katavi National Park confina per oltre 60km con il parco nazionale del Katavi. Hunting is done along these borders and often trophies are of excellent quality. Lions, leopard, roan, buffalo and elephant are plenty.

Gombe/Moyowoshi: this area is one of the best hunting destinations, which became famous through Mark Sullivan movies and it still has a large population of buffalo, lion and sitatunga.

Masailand

This area represents Hemingway's magic Africa, with open planes and acacia, habitat of many sought after species such as the lesser kudu, Grant's gazelle, Thompson's gazelle, ear fringed Oryx and gerenuk.

While this area is always good for planes game, for hunting lion and buffalo one must choose specific periods of the year in which the animals migrate outside the borders of the national parks. In these moments one can get unique buffalo trophies and the famous black maned Masai lion. For hunting leopard there is no particular best time in this area.

Camps overview

Our camps are always located in scenic positions with beautiful views. All of them can offer the best possible comfort for a hunting camp and they all have large and insect proof sleeping tents.

Rifles and Airport Arrivals

Rifle import for hunting rifles in Tanzania is fairly simple. The limit is three rifles per hunter and we have specialized staff that will follow through the procedures. Hunters are welcome by the authorities.

Air Charters: Our company flies only with the best charter companies, those that have grown and that are known for their

seriousness and maintenance which is either done or supervised by European or American staff. Saving on security is not our policy.

Hotel in the city: Both Dar Es Salaam and Arusha have excellent hotels. Please visit some of their web sites at:

www.kempinski-daressalaam.com
www.moevenpick-daressalaam.com
www.seacliffcourt.com

In Arusha:

www.thearushahotel.com
www.kibopalacehotel.com

Airline Companies: Several companies fly to Tanzania on daily basis, just visit their website for book a nice travel:

www.swiss.com
www.emirates.com
