## HUNTING WOLF IN MACEDONIA

**November to March**

In Macedonia there is the largest wolf population in Europe, in the two reserves of Stip and Sveti Nikole only local hunters harvested over 200 wolves last year.

We offer you the possibility to hunt wolves in Macedonia in small driven hunts and still hunt by night in winter. Driven hunts are organized for groups of 4-6 hunters. Best period is January and February when they are in the breeding season and move about a lot.

In the evening you can hunt mouflons, wild boars, fallow deer and other animals in the reserve of Lakavica, where you will also be accommodated.

---
